JOB EXPERIENCES

APPIRIO, A Wipro Company, Jaipur, India

SENIOR SALESFORCE
DEVELOPER
June 2018 – Present

SALESFORCE
DEVELOPER
June 2017 – June 2018

- Designed, developed and deployed Apex Classes, Controller Classes & Extensions, Test classes, Batches, Asynchronous Apex, error handling and Apex Triggers using bulk design patterns for various functional needs in the application and Salesforce customizations.
- Experience in handling Salesforce Configurations like Permission setting using OWD, Profiles, Permission sets, sharing rules, Validation Rules, Workflows, process builder, approval processes etc.
- Worked with Dynamic Apex to access sObjects and Field describe information, execute dynamic SOQL, SOSL and DML queries.
- Experience in lightning web components development. Actively worked on Lightning migration of internal Org and creation of custom LEX components.
- Responsible for Dell Boomi process creation and maintenance (Appirio -Wipro(Trace) Integration / Workday - SFDC Integration)

Key Achievements

- Being an internal IT team member donned on multiple hats for end to end project delivery starting from requirement gathering, analysis to design walkthroughs, development, testing and deployment into production org. serving multiple departments across Appirio like Finance, Marketing, HR, consulting Ops, transport etc.
- As a ADX(SFDX) evangelist, did a modularized version control POC for an internal module and presented it to entire technology team.

COGNIZANT Tech. Solutions, Pune, India

ASSOCIATE
DEVELOPER
Dec 2016 – May 2017

PROGRAMMER
ANALYST
May 2015 – Dec 2016

- Developed software solutions for a leading U.S. bank as a client in Banking & Financial Services (BFS) domain.
- Design and development of project as per client requirements to create a fault tolerant code with efficiency standards on Java platform.
- Wrote unit test cases for the specific unit; seek reviews from peers, resolving Sonarqube/Veracode security fixes related to the project.
- Worked on Java/J2EE technologies, Spring framework, Restful web services, Angular JS (basics), hibernate, Jsp, Servlets, SQL, DB2, mockito Junit framework.

Key Achievements

- Enhanced trust customer capabilities through SSO to client portal for finance management through the online banking app. Allowed offers to flow based on customer's eligibility and business rules.
- Assisted in Migration of code from JSP servlet architecture to Spring microservice framework for enabling the service layer for mobile banking and online banking apps.

PROJECTS

APPIRIO
GAMIFICATION ENGINE
- SFDX & LEX
MIGRATION

Gamification engine used for tracking a person's "Appirio story" i.e profile information, for rewards and recognition purpose.

- Migrated the application on CI/CD (GitLab CI) tools using SFDX & ADX for version control (GitLab) including extraction of manifests and retrieving their dependencies to create a stand alone package for automated Salesforce deployments.
- Created custom LEX components for essential modules like badges & Challenges etc.

APPIRIO'S
NEXT-GENERATION
ESTIMATOR TOOL (E2)

Tool used by sales team, to produce proposals faster by calculating all estimates of deal at one place.

- Developed & delivered critical features for the tool. Worked extensively on Slickgrid, Java Script, JQuery, conga composer and Apex along with responsibilities for testing, deployments and maintenance.
- Configured Conga templates for automated SOW generation for workday and salesforce practices, reducing manual efforts by 90%.

FLEXI TIME REQUEST
PORTAL(FTR)

A feature added in salesforce org to facilitate employees working in Shifts to avail company transportation, meals by raising the requests from this portal. It notifies the Transportation & facility teams to make the necessary arrangements.

- Provided solutions by developing approval process, workflow, email notifications and Triggers to implement the functionality.

EDUCATION

BACHELORS OF
TECHNOLOGY
2009 – 2013
